

Features and Advantages of Gianetti Wheels

1. Lighter (only weigh 41.5kg)
2. More ventilation holes for cooler running - \pm 25% more ventilation.
3. Have a safety bead for preventing the tyre bead from going over the valve in extreme conditions, which adds to the safety factor.
4. Suitable for drum as well as disc brake applications (Michelin spec)
5. Come with a factory fitted valve.
6. Have a built-in valve protector.

Wheel/tyre combination
with 27° valve wheel

Wheel/tyre combination
with 45° valve protected wheel
